FEATURES

1 MADE OF PREMIUM ABS MATERIAL

Superior top & side impact protection

2 INNER EPS FOAM LINER

Provides additional inner protection & greatly reduces the force of impact

3 REMOVABLE COMFORT PAD

This liner is dual purpose to provide true comfort and an additional impact absorption layer

4 REMOVABLE SWEATBAND

Keeps sweat out of the eyes while working + machine-washable / reusable to avoid stains and odor from prolonged use

5 PIVOT SYTEM

Allows the cinch fit system to pivot vertically providing a secure fit for all head shapes and sizes

6 RATCHET KNOB

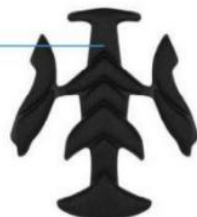

Allows you to easily tighten the helmet to your preference

SAFETY HELMET'S INTERNAL SHELL
In-mold construction with EPS core to reduce weight and provide more protection

PRESSURE-ABSORBING TECHNOLOGY
The helmet's inner shell has protective foam and designed to withstand impact from the front, rear and sides

SWEAT-WICKING TECHNOLOGY
Internally lined with removable, washable, synthetic wicking comfort pads

MAIN FEATURES:

Ergonomic Design For Great Comfort;
Provided With Ventilation System Which Guarantees A Good Interior Ventilation;
Comfortable, Washable And Replaceable Interior Padding;
Totally Replaceable Interior Regulation System (Chin Strap + Head Strap);
Robust Chinstrap, With Integrated Quick-release System Designed To Open If Snagged (Strength Between 15 And 25 Dan);
Provided With Head Lamp Clips And Earmuffs Quick Attachment;
Compatible With Shield And Visor, Easily Fitted;
Compatible With Dedicated Reflective Stickers.

EN 397:2012 OPTIONAL REQUIREMENTS:

protection against impacts and penetration down to -20° C;
resistance to lateral deformation.

【3-IN-1 Forestry Protective Helmet】 AUTOMAX safety forestry kit is composed of ANSI Approved Safety Hard Hat Helmet, Visor Eye Shield and NRR 25dB Earmuff Hearing Protectors. Forestry Helmet with visor and ear muffs hearing protection offer safety for our head against falling objects, eyes against flying branches and hearing with no risk.

【Comfort and Safety】 The two sides vents design provides forestry helmet with air circulation and breath-ability in hot weather. Low profile design and six-point ratchet suspension of forestry helmet keeps balance for head and improves comfort. Sweatband' moisture-wicking properties make our head comfortable all day long. Hard hat with chin strap design can reduce risk of losing safety helmet while work at height.

Mervex vent ANSI

【Comfort Fit】 :Adjustable 6-point suspension system for improved shock absorption and overall comfort. The replaceable soft egyptian cotton core sweatband with porous coating for maximum sweat absorption make workers comfort fit during whole working hours. Comfortable and convenient chinstrap with molded chin-cup for extra security and stability. Also it's easy to remove. One adjustable size fits most. Helmet size range from 53-63cm/ 20.86-24.80 inch.

【More Humanized Design】 :Sliding vent holes allow easy opening and closing based on weather conditions .Complete with Rapid-Dial ratcheting headgear, One-handed adjustment design allows workers to modify fit without removing work helmet, even with gloves on.

【Extra Protection】 :Accessory slots allow the use of multiple hard hat accessories. And the safety helmet has Hi-Viz design on the front-rear-and sides of the helmet to allow the user increased visibility under low light conditions.

【Ideal For】 :AUTOMAX Mervex Vent safety helmet is suitable for construction, tree climbing work, woodworking, mechanics, forestry, manufacturing, height and scaffolding work ,in any trade that requiring general head protection.

【Reliable&Durable&Stylish New Generation Safety Hard Hat】 :AUTOMAX safety hard hat is made of high impact penetration resistant ABS materials, lightweight, strong and comfortable. A good choice to protect heads against falling objects, impacts, bumps, and scrapes. And these safety hard hats meet ANSI Z89.1-2014 Type I Class C standards, also approved by CE(EN397:2012 -20 °C). Give you and your company the ideal choice in ANSI Type I head protection.

【Forestry Helmet System with Accessories】 :AUTOMAX 3 in 1 safety helmet comes with ABS helmet, adjustable/removable earmuffs, and mesh visor, providing dynamic protection for any job. Equipped with a pair of 25 dB NRR earmuffs that help block out tool and engine sound noise for hearing protection. Easy flip-up metal mesh provides good visibility and debris protection. The accessories is easy to assemble, come with detailed installation instructions.

【Comfort and Safety】 The two sides vents design provides forestry helmet with air circulation and breath-ability in hot weather. Low profile design and six-point ratchet suspension of forestry helmet keeps balance for head and improves comfort. Sweatband' moisture-wicking properties make our head comfortable all day long. Hard hat with chin strap design can reduce risk of losing safety helmet while work at height.

X-Armor

【Certified Protective Headgear】 : This work hardhat for men women meets the ANSI Z89.1 Type 1 Class C requirements,also approved by CE(EN397:2012 -20℃). so you can be job-site ready.Suitable for construction,tree climbing work,woodworking,mechanics, forestry,manufacturing,height and scaffolding work ,in any trade that requiring general head protection. If you have any questions about our safety helmet, we will answer you at the first time and give you the most satisfactory results.

【Light Weight Yet Tough】 : Our X-Armor series safety helmet hard hat made with a premium ABS outer shell material for impact protection and EPS impact foam for shock absorption. The high-density EPS liner optimizes all-around protection and reduces the force of impact to keep you covered.-Co-molded EPS foam with a ABS shell provides excellent impact absorption while remaining ultra-light, and enhanced rear impact protection keeps your fragile brain safe from injury.

【Adjustable】 : The easily adjustable chin strap and lower profile suspension system with a one-handed fit dial make fitting simple and secure. Wide range of adjustments for different head sizes. Adjustable chin strap with buckle that won't cause the helmet to move around on your head. 6-point suspension system for improved shock absorption and overall comfort.

【Additional Gains】 :The package includes a customized portable draw-string bag for easy carrying . In addition, our Hardhats Kit also included a customized cooling helmet liner.This cooling helmet liner is extremely soft and comfortable,reducing perspiration in hot and humid environments , dries quickly,making you feel comfortable,also keep your head cooling under helmets.v

HEAD PROTECTION

Designed to be one of the lightest and most breathable safety bump caps on the market, our bump caps can be used in a wide variety of applications. The stylish industrial safety bump caps, have been engineered for 360-degree comfort.

BUMP CAP INSERT (AIRLITE)

IMPACT-RESISTANT—This built-in impact shell has been patent protected in China, UK, USA and EU !

WITH PATENTED DYNAMIC COOLING TECHNOLOGY

PRECAUTIONS BEFORE USE: It is very important that the fitting instructions and recommendations are adhered to. If not the protection offered may be seriously impaired. Further information should be sought from the manufacturer. The enclosed product information sheet should be read before use.

CLEANING: Sponge clean with a mild detergent. Do NOT use paints, solvents, chemicals, adhesives, petrol or similar substances on this cap.

CHEMICALS: Certain chemicals may have a detrimental effect on contact with this product. If in doubt please check with your supplier.

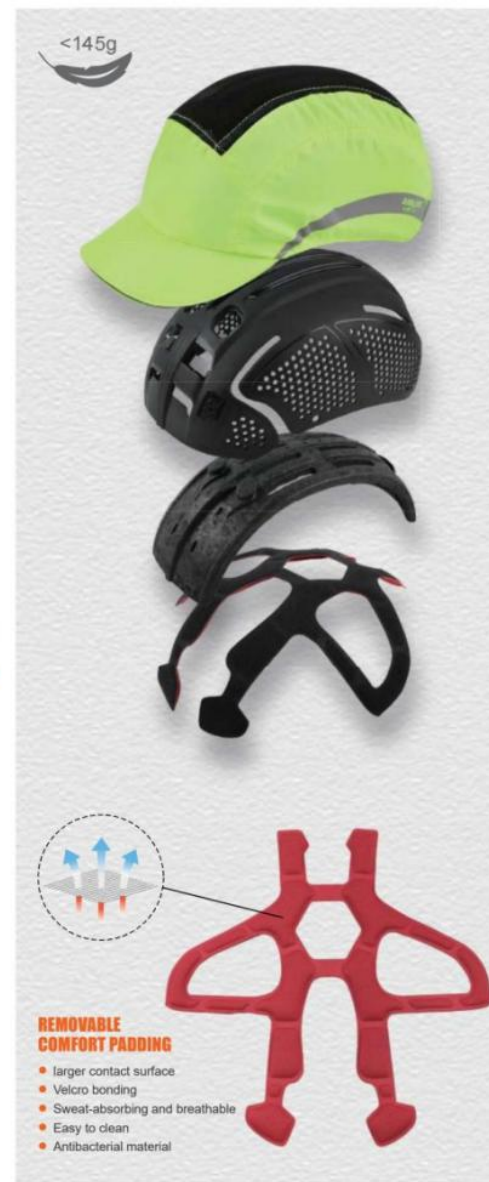

DAMAGE: This product should be carefully inspected before use and discarded if damaged in any way whatsoever.

MATERIAL DECLARATION: No parts of the product which are in contact with the wearer are made from materials known to cause skin irritation.

INSTRUCTIONS FOR USE:

1. Ensure plastic inner is fitted correctly and undamaged.
2. Place the cap on the head and adjust back strap to provide a secure fit.

NOTE: This product is designed to offer limited protection against contact with stationary objects such as low ceilings or hanging items. It is NOT designed to offer protection against falling objects. Do not modify.

BUMP CAP INSERT (MAVERICK)

EN 812³ Industrial bump caps

Protect the wearer against any impact with hard, fixed objects and the consequences thereof such as lacerations or other superficial injuries.

Binding requirements:

All industrial bump caps certified in accordance with EN 812 must meet these requirements.

- › Impact resistance – frontal and dorsal
- › Penetration resistance (against sharp and pointed objects)
- › Chin strap holder (if the industrial bump cap features a chin strap holder)

Chin strap releases at minimum 150 N and maximum 250 N

Optional requirements:

- › Very low temperatures (-20° C oder -30° C)
- › Electrical properties

Crash cap is embedded with foam pads for greater comfort and protection

The clever design provides excellent flexibility for the product, suitable for different adult head shapes and sizes. The cut-outs on the edge of the ears make it easy to wear earmuffs.

Rear Adjustment Buckles are continuously adjustable

* This built-in anti-collision cover has been patented in China, USA and Europe!

Modifications

Impact Absorbing Element

- › shock absorbing test
- › increased impact absorbing area covers whole testing area

Modifications

Bridges

- › the bridges could not be increased significantly
- › if the joints become too wide, the cap might not pass the penetration test

INSTRUCTIONS

Length adjustment
The length is easy to adjust for a perfect fit and optimum protection.

360° rotation
Range of positions possible with 360° capsule rotation. Earmuffs with a headband can be worn under the chin or around the neck.

Extremely light weight
Ultra low weight makes them comfortable even when worn for extended periods.

Length adjustment
The length is easy to adjust and fits like a tailor to achieve the best protection effect.

Memory foam
Wearer comfort guaranteed thanks to extra soft memory foam ear cushions, even when worn for long periods.

Resting position
Earmuffs can be rotated 360° for easy use from standby and resting positions.

Padded headband
Padded headband for optimum comfort, when worn for long periods.

Dielectric
Metal-free earmuffs suitable for use in workplace environments with exposure to electrical voltage.

Foldable
Foldable earmuffs for easy carrying

RESPIRATORY PROTECTION

Your lungs and airways are vital to your survival. This is why you need to protect them against harmful particles that can cause chronic and, in some cases, fatal diseases. To ensure that you are well-protected at work, you need to wear respiratory protection throughout your working day, which means that it must be comfortable and fit your face well.

FACTS AND FUNCTIONS

Filtering half-masks prevent harmful particles from entering your respiratory system. To be able to choose the right mask, it is important to know which types of particles are present in your work environment and in what concentrations. The mask must also be easy to adjust to your face shape so that it fits tightly and does not let particles through. Our filtering half-masks will keep you safe and comfortable in work environments where the air is polluted.

THIS IS HOW IT WORKS

Filtering half-masks are designed for environments where the air has a normal oxygen content. They are made from a highly effective filter material that traps and retains particles.

The composition of the material plays a crucial role in both the filtering effect and the breathing resistance.

The air you breathe in passes through the filter material, while the air you breathe out passes through the filter material or through an exhalation valve. Masks with an exhalation valve have a lower breathing resistance.

TWO MODELS

Folding and cup-shaped mask models are available. The folding masks take up less space and are particularly easy to carry with you.

NO BEARDS

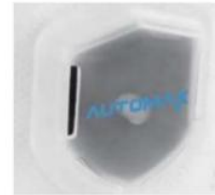

Beards or heavy stubble prevent the mask from fitting tightly against the face which significantly reduces the protection factor.

FUNCTIONS

EFFECTIVE FILTERING

The innovative filter material effectively traps and retains particles while offering a very low breathing resistance.

EXHALATION VALVE

A valve that extracts moisture, heat and carbon dioxide very effectively and allows the mask to be used comfortably throughout the working day.

SOFT SEAL

Flexible seal material over the nose or around the entire inside of the mask.

ELASTIC ADJUSTMENT

Woven elastic strap or two woven elastic straps with 4-point buckles for perfect adjustment and fit.

CLASSIFICATIONS

FFP PROTECTION CLASSES

Filtering half-masks are approved in protection classes FFP1, FFP2 and FFP3. They have to fulfil specific requirements concerning effective particle separation, breathing resistance and leakage, among other things. The higher protection classes also include the requirements for the lower protection classes. AUTOMAX's filtering halfmasks are in protection classes FFP1, FFP2 and FFP3.

FILTRATION LEVEL

Filtering half-masks are tested and approved according to EN 149:2001+A1:2009. Paraffin oil in aerosol form is used in the test to simulate particles. This means that the masks are exposed to liquid particles which are normally more difficult to filter out than solid particles. The filtering level is given as a percentage. The figure represents the lowest proportion of particles that the mask can filter out.

NOMINAL PROTECTION FACTOR

The protection factor is the relationship between the air pollution content inside and outside the respiratory protection system. The standards define the nominal protection factor required from different types of respiratory protection. The protection factor is measured in a laboratory environment and is referred to as a nominal protection factor.

Examples: If a mask in protection class FFP3 has a nominal protection factor of 50, this means that the air pollution content inside the mask is one fiftieth or 2% of the content outside. If the particle content of the air outside the mask is 10 times the permitted limit, the content inside the mask will be one fifth or 20% of the limit. ($10/50=1/5=20\%$).

The following filtration efficiency levels and nominal protection factors apply to filtering half-masks approved according to EN 149:2001+A1:2009:

Protection Class	Inhalation resistance 30l/min.	Inhalation resistance 95l/min.	Exhalation resistance 160l/min.
FFP1*	0,6	2,1	3,0
FFP2**	0,7	2,4	3,0
FFP3***	1,0	3,0	3,0

- * Does not protect against carcinogenic and radioactive substances, microorganisms (bacteria, viruses, spores) or biochemical compounds (enzymes, hormones).
- ** Does not protect against microorganisms (viruses, spores) or biochemical compounds (enzymes, hormones).
- *** Protects against all types of particles.

MARKINGS

NR = NOT REUSABLE

Filtering half-masks marked NR can only be used for one working day and must then be discarded.

R = REUSABLE

Filtering half-masks marked R can be used for several working days, providing that the manufacturer has included cleaning instructions.

D = DOLOMITE TESTED

Filtering half-masks can be subjected to a Dolomite test according to EN 149:2001+A1:2009. The test simulates an increased level of solid particles which corresponds to the situation in a mine, for example. Masks which meet the requirements of the test in terms of their filtering level and breathing resistance can be marked D.

AUTOMAX AIR FORCE SERIES

CLEAN AIR – EASIER BREATHING

Latex-free comfortable headstrap for maximum comfort.

Comfortable and flexible nose seal.

Foldable in three sections for easy adjustment to the face.

Better safety with effective filtration and low breathing resistance.

One sizes. real good fit and comfort.

Effective exhalation valve. Our most effective yet.

AIR FORCE SERIES

High-performance mask with a very high level of filtration efficiency which provides protection against fine dust and particles. The exhalation valve extracts moisture, heat and carbon dioxide very effectively and allows the mask to be used comfortably. This premium mask is available in two sizes and combines user-friendliness, exceptional comfort and a perfect fit. It ensures the highest possible safety even for people who wear glasses.

- Disposable mask for a maximum of one working day (NR).
- Soft, flexible nose seal.
- Contains no latex.
- Individually packed in plastic bags for hygiene reasons. (Pack of 15 or 20).
- Dolomite tested (D).
- Compliant with EN 149:2001+A1:2009.

EYE PROTECTION

The only way to be absolutely safe from eye injuries in the workplace is to wear the right eye protection throughout your working day. For this reason, it is essential that your safety spectacles fit correctly and have the right features for the task and, importantly, the right design. One thing leads to another. If you're confident about your safety spectacles then you're safe at work!

8560 ANSI CE AS

Super-lightweight, comfortable safety spectacles with a perfect fit.
